Language proficiency

Fluent in Dutch and English
Intermediate-level French

Minerals are the principal source of information on the conditions and processes in natural and man-made environments. My research focuses on extracting this information using a combined approach of experiments, thermodynamic modelling and the micro-analytical study of samples.

Research aims and interests

- gain a fundamental understanding of element uptake by minerals from experiments and atomistic simulations, and use this to reconstruct physical and chemical conditions in the formation environment from mineral composition
- explore the use of trace elements in minerals, metals, fluids and glass as a provenance and process indicator
- use thermodynamic modeling to predict and understand the mineralogy of materials, mineral compositions, mass and energy balance, and the evolution therein during natural and industrial processes
- Provide the thermodynamic data and models needed for the transition to carbon-neutral and circular processing of resources

Current position

2018-present
2023-present

Associate Professor and Osisko Faculty Scholar in the Department of Earth and Planetary Sciences, McGill University in Canada.
Co-Director of the GEOTOP inter-university strategic research centre, Canada

Previous positions and education

2022	Knowledge Group Leader , Microstructure and Surface Characterization Group, Tata Steel Europe R&D, the Netherlands.
2019-2022	Principal Researcher , Microstructure and Surface Characterization Group, Tata Steel Europe R&D, the Netherlands.
2012-2018	Assistant Professor and Osisko Faculty Scholar in the Department of Earth and Planetary Sciences, McGill University in Canada.
2012-present	Director of the McGill Laser-Ablation ICP-MS facility.
2010-2012	Marie Curie Postdoctoral Research Fellow in the Department of Earth Sciences, University of Oxford
2007-2010	Postdoctoral Fellow and Tomlinson Scholar in the Hydrothermal Geochemistry Laboratory of McGill University, Montreal, Canada
2006-2007	Researcher at the Ceramics Research Centre, Tata Steel RD&T, the Netherlands
2002-2006	PhD position at the University of Bristol in the UK, with a thesis on “Tourmaline: monitor of the <i>P-T-X</i> evolution in rocks”, supervised by Dr. John C. Schumacher.
2001-2002	Researcher at the Ceramics Research Centre, Tata Steel RD&T, the Netherlands
1997-2001	MSc degree in Geochemistry at Utrecht University, the Netherlands, graduated cum laude
1996-1997	Cum laude Propadeuse degree in Geology at Utrecht University, the Netherlands

Teaching experience

- McGill undergraduate and graduate teaching duties; Metamorphic Petrology, Geostatistics and Data Analysis, Auvergne Fieldschool (4 weeks), Analytical Techniques, Thermodynamics of Hydrothermal Solutions, Pseudosection Modelling (Copenhagen University, Denmark, 2019; McGill, 2018), Ore Forming Processes, New England Fieldschool, and Applied Geochemistry. Course details are available at my teaching materials website: www.eps.mcgill.ca/~hinsberg/intro/Teaching.html

- Visiting lecturer in metamorphic petrology at the University of Botswana (2005) for courses in Metamorphic Petrology and Optical Microscopy (third year undergraduate level) and instructor for the Endogenic Petrology fieldschool in Ploumanac'h, Brittany for the École Nationale Supérieure de Géologie de Nancy (2011 and 2012).
- DIVEX shortcourse on “Extracting Value from Geochemical Data” in Québec, Canada (Nov 2012).
- Shortcourse associated with the AEMQ - X’PLOR conference in Montreal on “Exploring and mining your geo-data: Quality control, Data descriptors and Process identification” (2014, 2016).
- Geotop inter-university short course in Geostatistics for students, postdocs and staff (2024).

Analytical competence

Throughout my research, I have used a wide diversity of analytical methods, and have developed dedicated routines and analytical strategies. The techniques I am most familiar with include;

- electron microscopy and microprobe, including WDS and EDS element quantification and mapping
- X-ray fluorescence and diffraction, including Rietveld refinement of XRD spectra
- synchrotron X-ray mapping and diffraction (Diamond Lightsource, UK, and the CLS in Saskatoon, Canada)
- optical microscopy using transmitted and reflected light and associated image analyses
- wet chemical techniques; ICP-OES, ICP-MS, flame-AAS/AES, colorimetry and ion-selective electrodes
- secondary ion mass spectrometry (Cameca ims 1270 at the CRPG in Nancy)
- in-situ laser-ablation quadrupole, time-of-flight and magnetic sector ICP-MS
- thermo-gravitational and calorimetric techniques (TGA, DTA and DSC)

Experiments have become an increasingly important component in my research, and include mineral synthesis and element exchange experiments using one atmosphere furnaces, cold-seal hydrothermal pressure vessels, internally heated pressure vessels and the piston-cylinder apparatus. I set up an experimental facility at McGill University that includes a rapid-quench cold-seal pressure vessel and rocking autoclave that I designed and built.

Academic and administrative contributions

- 65 peer reviewed publications, 2 in review; 2650 citations; *h*-index = 33; *i10*-index = 51 (Google Scholar).
- Executive Committee member for the GEOTOP research centre (www.geotop.ca).
- Councillor for the Mineralogical Association of Canada (2015-2017) and member of the MAC Student Scholarship, Young Scientist Award, Travel Grant, and Councillor Nominating committees.
- Member of the Mineralogical Society of America workshop committee (2019).
- Co-convener of oral presentation sessions at the AGU, Goldschmidt, GAC-MAC, and SGA conferences.
- Member of the organizing committees for the RFG2018 conference and the Tur2017 and Tur2021 meetings.
- Coordinator of the international effort to develop tourmaline reference materials for trace elements
- Associate editor for the European Journal of Mineralogy
- Special issue editor for the Canadian Mineralogist (vol. 49, issue 1) on tourmaline as an indicator mineral, and a Frontiers Special Topic on The Early Crust and its formation.
- Reviewer for, amongst others, American Mineralogist, CALPHAD, Canadian Mineralogist, Chemical Geology, Economic Geology, Journal of Petrology, Lithos, Nature Geoscience, Geochemical Perspectives Letters and research proposals to the NSERC-RTI program (Canada), Deutsche Forschungsgemeinschaft (Germany), the National Science Foundation (US) and the Los Alamos National Laboratory (US).
- Member of the McGill McCall MacBain Foundation scholarship committee (2020, 2021), of the Gault Reserve research grants committee (2023), and chair of the Wares Postdoctoral Fellowship committee (2022).

Research students

Since 2012, I have supervised 5 postdocs, 10 PhD, 5 MSc and 7 BSc research students at McGill University working on a variety of topics around a central theme of understanding element partitioning among minerals, melts and aqueous fluids. My graduated students and postdocs work in research in academia and industry, in policy development and advocacy, and in technical and environmental consultancies.

Grants, scholarships and awards

I was awarded the Mineralogical Association of Canada Young Researcher Medal in 2019 and the Hutchinson Medal of the Geological Association of Canada in 2021.

In all stages of my academic career, I have funded my research through highly competitive Fellowships and Grants starting with a University of Bristol Strategic Postgraduate Scholarship and NERC Small Research Grant for my PhD, a Rubicon Postdoctoral Fellowship from the Netherlands Organisation for Scientific Research and Tomlinson Scholarship for my Postdoc at McGill, and a European Union Marie Curie IIF Research Fellowship for my position in Oxford.

My research program at McGill is funded by national and provincial grants for operating costs and to acquire equipment, including FRQNT New Researcher and Team grants, NSERC Discovery and RTI grants and a Canadian Foundation for Innovation Leaders Opportunity Fund. I have been awarded \$2.4M in funds as principal investigator and \$9.8M as a co-investigator.

Academic collaborations

Artas Migdisov - Los Alamos National Laboratory (US)
Barbara Dutrow - Louisiana State University (US)
Bernie Wood - University of Oxford (UK)
Bjarni Gautason - ISOR (Iceland)
Bob Trumbull - GFZ Potsdam (Germany)
Corentin Caudron - University of Cambridge (UK)
Darrell Henry - Louisiana State University (US)
Daniele Pinti - UQÀM (Canada)
Eleanor Berryman - CANMET-NRC (Canada)

Horst Marschall - Goethe University Frankfurt (Germany)
In-Ho Jung - Seoul National University (South Korea)
Jake Lowenstern - USGS (US)
John Schumacher - University of
John Slack - USGS (US) retired
Kristoffer Szilas - Copenhagen University (Denmark)
Maria Martinez-Cruz - OVSICORI-UNA (Costa Rica)
Nynke Keulen - GEUS (Denmark)

Outreach

- Moderator of the mailing list for the Perple_X suite of thermodynamic modelling programs.
- Invited participant of the 2014 Cities on Volcanoes workshop at Kawah Ijen volcano in Indonesia, aimed at communicating volcanic and environmental hazards associated with this system to government officials
- Geological guide on a fieldtrip for amateur geologists to Namibia and Botswana (2013).
- Scientific advisor for documentaries on Kawah Ijen for the BBC (Forces of Nature: Moth and The Flame, 2016), Der Spiegel TV (2016), and National Geographic (2017, 2020).
- Interviewed by Science Friday about our research on Kawah Ijen (<http://sciencefriday.com/blogs/07/03/2014/picture-of-the-week-kawah-ijen-volcano.html>)
- Public talk in support of the UNESCO Geopark application for the Ijen Caldera in Indonesia.

143. **van Hinsberg V** (2023) Deciphering the compositions of fluids in the Earth: Rubies, volcanoes and the origins of life. Invited lecture, Université d'Orléans, France
144. **van Hinsberg, V**, Saby M, Pinti, DL, Berlo, K, Gautason B, Sigurðardóttir, Á.K. (2022) Sources and transport of metals in magmatic-hydrothermal systems. Invited Hutchinson lecture, GACMAC meeting, Halifax.

Hutchinson Medalist Lecture tour:

- van Hinsberg, V.** (2020, 2021) Deciphering the compositions of fluids in the Earth: Rubies, volcanoes and the origins of life.
145. Alberta, hosted by Mount Royal University, Calgary
146. Eastern Canada, hosted by Dalhousie University
147. Quebec, hosted by Laval University, Quebec City
148. Eastern Ontario, hosted by the Geological Survey of Canada
- van Hinsberg, V.** (2020, 2021) Sending probes into the deep Earth to understand subduction.
149. University of British Columbia, Okanagan
150. Alberta, hosted by University of Calgary

151. Eastern Canada, hosted by Saint Mary's University
 152. Simon Fraser University, Vancouver
 153. Eastern Canada, hosted by Memorial University, Saint-John, Newfoundland
 154. Central Canada, hosted by the University of Manitoba, Winnipeg
 155. Northern BC and the Yukon, hosted by the Yukon Survey
 156. Western Ontario, hosted by Lakehead University
- 157. van Hinsberg V, Yakymchuk C, Kirkland C, Szilas K (2021)** The corundum conundrum: Constraining the conditions of ruby formation in high-grade metamorphic melanges of SW Greenland. Invited lecture, Geological Association of Canada Celebration week.
- 158. van Hinsberg VJ (2021)** Tourmaline elemental partitioning with melts, fluids and minerals: how to interpret tourmaline (trace element) composition. NATURA 111 (1): 113-114. Invited keynote, TUR2021 3rd International Conference on Tourmaline
- 159. van Hinsberg VJ (2019)** Minerals as probes of fluid composition: Exploring the physico-chemical controls on element uptake by minerals with applications to understanding ore formation, plate tectonics and the early evolution of life. Mineralogical Association of Canada Award presentation. GAC-MAC conference, Quebec City, Canada.
- 160. van Hinsberg VJ, Szilas K, Kisters A, Crotty C, Roozen S (2019)** The Tartoq greenstone belt of SW Greenland: A geochemical window into early plate tectonics and the composition of the Archaean ocean. Institute for Geosciences and Natural Resource Management, University of Copenhagen, Denmark.
- 161. van Hinsberg VJ (2019)** How do minerals get their composition and how do we use this to monitor volcanoes? Petrologisk Klub seminar, University of Copenhagen, Denmark.
- 162. van Hinsberg V, Crotty C, Roozen S, Szilas K, Kisters A (2019)** Pressure-temperature history of the >3 Ga Tartoq greenstone belt in SW Greenland: Evidence for an early style of subduction. Geological Survey of Denmark and Greenland, Copenhagen, Denmark.
- 163. van Hinsberg VJ (2018)** Using microstructures and phase compositions to understand (geo)-materials: Thermodynamic modeling, Lattice-strain theory and chemometrics. Tata Steel Research colloquium, IJmuiden, the Netherlands.
- 164. van Hinsberg VJ (2017)** Lattice-Strain Theory: Exploring the physical and chemical controls on element partitioning among minerals, fluids and melts, and the use of Lattice-Strain Theory in extrapolating to extreme conditions. Frontiers in Geosciences Colloquium, Los Alamos National Laboratory, US.
- 165. van Hinsberg VJ, Beard C, Yang L (2017)** The impact of fluorine on phase relations and element partitioning in alkaline melts. HiTech AlkCarb Expert Council meeting, Edinburgh, UK.
- 166. van Hinsberg VJ (July 2015)** Volcano monitoring back in time: The Kawah Ijen crater lake in East-Java, Indoensia. Cascades Volcano Observatory, Vancouver, USA.
- 167. van Hinsberg VJ (May 2014)** There and back again: New insights into subduction zones from mineral probes. Goethe University Centennial meeting, Frankfurt, Germany.
- 168. van Hinsberg VJ, Wood BJ, Franz G (Oct 2013)** The wondrous world of element partitioning: Towards a new model for subduction zones. Louisiana State University, Baton Rouge, USA.
- 169. van Hinsberg VJ (April 2013)** Minerals as indicators of conditions in and on the Earth: Lattice-strain theory applied to mineral-fluid systems. Environment Centre, Lancaster University, UK.
- 170. van Hinsberg VJ (Jan 2013)** There and back again: Minerals as indicators of conditions in and on the Earth. University of Oxford, UK.
- 171. van Hinsberg VJ (Oct 2012).** Reconstructing the composition of fluids in and on the Earth: Lattice-strain theory applied to mineral-fluid systems. University of Edinburgh, UK.
- 172. van Hinsberg VJ, Wood BJ, Franz G, Williams-Jones AE (April 2011)** Reconstructing the compositions of fluids in the Earth: Lattice-strain theory applied to mineral-fluid systems. Centre de Recherches Pétrographiques et Géochimiques (CRPG) Nancy, France.
